

# Sanskar Public School

**Class: 4**

## **Subject - Computer Ch-1 Computer System**

### **Question and Answer:-**

**Q.1 Name any two input devices ?**

A.1 Keyboard , Mouse .

**Q.2 What are the type of internal memory ?**

A.2 The types of internal memory are random access memory ( RAM) and read only memory (ROM)

**Q.3 What are the different parts of a CPU unit ?**

A.3 The different parts of CPU are as follows :-

1. Arithmetical and logical unit ( ALU )
2. Control unit ( CU )
3. Memory unit ( MU )

**Q.4 What is the need for secondary memory ? Name any three secondary storage devices ?**

A.4 The storage capacity of primary memory is limited and is not sufficient to hold a large volume of data .  
Hence secondary memory is used to store data permanently , until it is deleted .

Three secondary storage devices are as follow :-

1. CD – ROM
2. DVD
3. Hard disk

**Q.5 What are output devices ? Explain with example**

A.5 Output devices are the devices that are used to display the results produced by a processor .

Some examples of output devices are as follows :-

1. Monitor – it displays the work done by a computer .
2. Speakers – they are used to listen to music and other sounds .
3. Printer – it is used to print the work done on a computer on to a sheet of paper .
